Software Night
EcoSys & Enterprise Projects Performance

Kim Allan

Director of Business Development in Canada for Hexagon PPM.

Kim Allan is the Director of Business Development in Canada for Hexagon PPM. With a career spanning over 35 years in Project Management and Project Controls, her extensive subject matter expertise in the industry has enabled her to provide project management advice to EcoSys clients worldwide. Given her experience in project controls, she has been previously invited to present for AACE sections in California, Alaska and Toronto.

Summary:

Simply delivering quality projects on time and on budget is no longer an acceptable benchmark of success. Instead, projects performance today requires a broader perspective. Do our project portfolios deliver the intended strategy? Are business goals and financial objectives being met? Only by selecting the right projects, in conjunction with exceptional project delivery, can you meet and exceed the performance results demanded today. We'll provide an introduction to the EcoSys Enterprise Projects Performance (EPP) software platform. By natively combining portfolio, project, and contract management processes into a single, flexible solution, EcoSys delivers increased visibility and greater predictability across the project lifecycle to empower informed decisions that maximize returns for owners and agencies and margins for contractors.

Through discussion and a live software demonstration, we'll showcase how EcoSys:

- Aligns strategic objectives with project execution
- Optimizes enterprise resources for greater capital efficiency
- Drives efficiency by eliminating data siloes
- Promotes organizational standards while maintaining flexibility
- Controls project cost and schedule with timely and accurate forecasting

Refreshments from 5:15 pm Meeting from 6:00 to 7:15 pm
